QSCI Classical vs. Quantum -- Master Scorecard
Forecasting accuracy (wMAPE)
Classical (not statistically distinguishable)
(LOW (n=14, low statistical power))
Forecasting runtime (solver-only)
Classical
(HIGH)
Routing feasibility rate (mean across N)
Classical
(HIGH)
Routing optimality gap (annealing, mean of best-per-size)
Classical
(HIGH)
Routing runtime (solver-only, N=4)
Quantum
(HIGH)
Resource scaling with problem size
Classical
(HIGH)
Implementation complexity
Classical
(MODERATE (qualitative))
Business impact (illustrative $ only)
Inconclusive
(LOW (illustrative))
